7540.03 - **STUDENT EDUCATION TECHNOLOGY ACCEPTABLE USE AND SAFETY**

Technology has fundamentally altered the ways in which information is accessed, communicated, and transferred in society. As a result, educators are continually adapting their means and methods of instruction, and the way they approach student learning, to incorporate the vast, diverse, and unique resources available through the Internet. The School Board provides **Education Technology Resources (as defined in Bylaw 0100) to support the educational and professional needs of its students and staff. With respect to students , Corporation Technology Resources afford them the opportunity to acquire the skills and knowledge to learn effectively and live productively in a digital world. The Board provides students with access to the Internet for limited educational purposes only and utilizes online educational services/apps to enhance the instruction delivered to its students. The Corporation's computer network and Internet system do not serve as a public forum, and the Board imposes reasonable restrictions on its use consistent with its limited educational purpose. ~~so that students can acquire the skills and knowledge to learn effectively and live productively in a digital world. The School Board provides students with access to the Internet for limited educational purposes only and utilizes online educational services to enhance the instruction delivered to its students. The Corporation's Internet system does not serve as a public access service or a public forum, and the School Board imposes reasonable restrictions on its use consistent with its limited educational purpose.~~**

~~This policy and its related administrative guidelines and the Student Code of Conduct govern students' use of the Corporation's personal communication devices (that is, according to Board Policy 5136, computers, laptops, tablets, e-readers, cellular/mobile telephones, smartphones, and any other web-enabled device), network, and Internet connection and online educational services ("Education Technology" or "Ed-Tech").~~

~~The due process rights of all users will be respected in the event there is a suspicion of inappropriate use of the Education Technology. Users have no right or expectation to privacy when using Ed-Tech (including, but not limited to, privacy in the content of their personal files, e-mails, and records of their online activity while on the network and Internet).~~

The Board regulates the use of Corporation Technology Resources by principles consistent with applicable local, State, and Federal laws, the Corporation's educational mission, and articulated expectations of student conduct as delineated in the Student Code of Conduct. This policy, its related administrative guidelines and the Student Code of Conduct govern students' use of Corporation Technology Resources and students' personal communication devices when they are connected to the Corporation computer network, Internet connection, and/or online educational services/apps, or when used while the student is on Corporation-owned property or at a Corporation-sponsored activity (see Policy 5136).

Users are prohibited from engaging in actions that are illegal (such as libel, slander, vandalism, harassment, theft, plagiarism, inappropriate access, and the like) or unkind (such as personal attacks, invasion of privacy, injurious comment, and the like) when using Corporation Technology Resources. Because its Technology Resources are not unlimited, the Board also has instituted restrictions aimed at preserving these resources, such as placing limits on use of bandwidth, storage space, and printers.

Users have no right or expectation to privacy when using Corporation Technology Resources (including, but not limited to, privacy in the content of their personal files, e-mails, and records of their online activity when using the Corporation's computer network and/or Internet connection).

First, **and foremost**, the Corporation may not be able to technologically limit access, to services through its Education Technology, to only those services and resources that have been authorized for the purpose of instruction, study and research related to the curriculum. Unlike in the past when educators and community members had the opportunity to review and screen materials to

assess their appropriateness for supporting and enriching the curriculum according to adopted guidelines and reasonable selection criteria (taking into account the varied instructional needs, learning styles, abilities, and developmental levels of the students who would be exposed to them), access to the Internet, because it serves as a gateway to any publicly available file server in the world, opens classrooms and students to electronic information resources that may not have been screened by educators for use by students of various ages.

The Board prohibits the sending, receiving, viewing, or downloading of materials that are harmful to minors on computers and other technology related devices owned or leased by the Corporation or connected to the Corporation computer network.

Pursuant to **State and** Federal law, the Board has implemented technology protection measures, which protect against (e.g., filter or block) access to visual displays/depictions/materials that are obscene, constitute child pornography, and/or are harmful to minors, as defined by the Children's Internet Protection Act. At the discretion of the Board or the Superintendent, the technology protection measures may be configured to protect against access to other material considered inappropriate for students to access. The Board also utilizes software and/or hardware to monitor online activity of students to restrict access to child pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors. The technology protection measures may not be disabled at any time that students may be using the **Education Corporation Technology Resources**; if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act. Any student who attempts to disable the technology protection measures will be subject to discipline.

The Superintendent or designee may temporarily or permanently unblock access to websites or online education services containing appropriate material, if access to such sites has been inappropriately blocked by the technology protection measures. The determination of whether material is appropriate or inappropriate shall be based on the content of the material and the intended use of the material, not on the protection actions of the technology protection measures.

Parents/Guardians are advised that a determined user may be able to gain access to services and/or resources on the Internet that the Board has not authorized for educational purposes. In fact, it is impossible to guarantee students will not gain access through the Internet to information and communications that they and/or their parents may find inappropriate, offensive, objectionable or controversial. Parents of minors are responsible for setting and conveying the standards that their children should follow when using the Internet.

Pursuant to Federal law, students shall receive education about the following:

- A. safety and security while using e-mail, chat rooms, social media, and other forms of direct electronic communications
- B. the dangers inherent with the online disclosure of personally identifiable information
- C. the consequences of unauthorized access (e.g., "hacking", "harvesting", "digital piracy", etc.), cyberbullying, and other unlawful or inappropriate activities by students online
- D. unauthorized disclosure, use, and dissemination of personal information regarding minors

Staff members shall provide instruction for their students regarding the appropriate use of technology and online safety and security as specified above. Furthermore, staff members will monitor the online activities of students while at school.

Monitoring may include, but is not necessarily limited to, visual observations of online activities during class sessions; or use of specific monitoring tools to review browser history and network, server, and computer logs.

Building principals are responsible for providing training so that Ed-Tech users under their supervision are knowledgeable about this policy and its accompanying guidelines. The Board expects that staff members will provide guidance and instruction to students in the appropriate use of **Education Corporation Technology Resources**. Such training shall include, but not be limited to, education concerning appropriate online behavior, including interacting with other individuals on social **networking-websites media** and in chat rooms and cyberbullying awareness and response. **All Ed-Tech-users Users of Corporation Technology Resources** (and their parents if they are minors) are required to sign a written agreement to abide by the terms and conditions of this policy and its accompanying guidelines.

Students will be assigned a school email account that they are required to utilize for all school-related electronic communications, including those to staff members, **peers**, and individuals and/or organizations outside the Corporation with whom they are communicating for school-related projects and assignments. Further, as directed and authorized by their teachers, they shall use their school-assigned email account when signing up/registering for access to various online educational services, including mobile applications/apps that will be utilized by the student for educational purposes.

Students and staff members are responsible for good behavior **on-the-Corporation's-computers/network-and-Educational Technology-just-as when using Corporation Technology Resources - i.e., behavior comparable to that expected of students when** they are in classrooms, school hallways, and other school premises and school sponsored events. Communications

on Education Technology are often public in nature. General school rules for behavior and communication apply. The Corporation does not sanction any use of **Education** its Technology Resources that is not authorized by or conducted strictly in compliance with this policy and its accompanying guidelines.

~~Students shall not access social media for personal use from the Corporation's network, but shall be permitted to access social media for educational use in accordance with their teacher's approved plan for such use.~~

Students may use Corporation Technology Resources to access or use social media only if it is done for educational purposes in accordance with their teacher's approved plan for such use.

Users who disregard this policy and its accompanying guidelines may have their use privileges suspended or revoked, and disciplinary action taken against them. Users **of the Corporation's Education Technology** are personally responsible and liable both civilly and criminally, for uses of **Education** Technology Resources not authorized by this **Corporation** Policy and its accompanying guidelines.

The **School** Board designates the Superintendent and designee as the administrator(s) responsible for initiating, implementing, and enforcing this Policy and its accompanying guidelines as they apply to students' use of the Corporation's Education Technology.
