3 REPORTS

Mr. Tim Armstrong, Assistant Superintendent

Budget impacts of legislation: We are starting to receive guidance from state agencies on the impacts of new legislation and will be digesting it as we can. Attached are the latest from DLGF concerning budgeting matters and property tax referenda, local income taxes, and controlled projects.

ISBA published a digest of the new legislation, which is also attached.

Broad outline of the budget 2026: I had hoped to include an overview this month, but I am not comfortable giving out anything that would be considered gospel at this time.

Using one of our donation funds, we have adjusted the accounts of Free and Reduced students. The amount of the adjustments was a total of \$942.17. We are continuing to work on this as there is still a negative balance of \$5,318.59.

Additionally, you will find a Continuing Disclosure statement that provides information about the tax base and tax rate.

The final item is a printout of state support SGSC has received during the fiscal year ending 30 June 2025 which shows each category of revenue along with a total of each month.

Minutes:

The Board received information on the May financial and cafeteria reports, as well as memos and information regarding recently passed state legislation that will impact taxpayers and the school corporation.

5.4 Proposal from Policy Analytics *(5 minutes)*

Mr. Tim Armstrong, Assistant Superintendent

Policy Analytics will undertake an analysis of factors influencing the assessed valuation [AV] for the South Gibson taxing districts. This analysis will include a review of historical AV trends by property class.

Policy Analytics will develop a tax base forecast for the South Gibson taxing districts, informed by past tax base growth and current development trends. These projections will include district, unit, and fund-level analysis reporting.

Using its proprietary parcel-based property tax model, Policy Analytics will estimate the circuit breaker implications and provide circuit breaker projections under reasonable levy and assessed value growth scenarios for South Gibson and overlapping taxing districts through 2035.

Using its calculated circuit breaker estimates, Policy Analytics will provide “net property tax revenue” projections for South Gibson for relevant years.

Policy Analytics will provide representative taxpayer analysis and illustrations for the requested scenarios.

Policy Analytics will summarize the outcomes of the analysis into a report format and present the findings, at the requested intervals, to the school administrative leadership.
